### About This Game

This game is based on the creator's own personal experience. Experience the world through a patient diagnosed with severe depression, sinking deeper into the darkness. Through the game, we want to show that don't be scared of the "shadow" within one's heart. It grows with you. It communicates with you, and one day, you will find deep inside of you, the real you.

### Features

- Discover the Maps Within Your Mind: Starting in darkness, the path to the next level is always hidden in dark mist. The path can only be illuminated by the player's actions.
- Simple, Intuitive Controls with In-Depth Gameplay: Use the arrow keys to simultaneously control both the main character and his shadow. They are bound to each other and will move in the same direction horizontally, yet move in opposite directions vertically.

This game looks really interesting to me but unfortunately as soon as I go in the closet the game freezes. I don't know if that is a normal problem for people but hopefully nobody else has this problem.. This is my type, the gameplay, the pic, the character, and start in the dark mist makes everything so mysterious.I love it.. As described this is a puzzle platformer, with a nice aesthetic and music. I did not have any issues with it freezing for me.

To see some of the gameplay, check out youtube:
